Dear _____

Date
Ref.

We have made an arrangement for you to visit our department on
xx.xx.xxxx.

According to the Danish Guidelines on preventing the transmission of methicillin-resistant staphylococcus aureus (MRSA), health personnel based in a country outside the Nordic countries should be screened for MRSA within 1 month before arrival.

Therefore, 14 days before your arrival in our department we ask you to be tested for MRSA by your own general practitioner. If your test is positive for MRSA, you will need treatment, which must be initiated at the latest 24 hours before starting.

Page 1/1

On the day you start please bring documentation verifying your test results and possible treatment. Please note that failure to provide documentation can delay your visit in our department.

We hope this does not inconvenience you too much and look forward to your visit to our department.

Yours sincerely,
